1.0 EXECUTIVE SUMMARY

River Hawk Environmental, LLC (RHE) has been retained by the Town of Stoughton to perform a Phase I Environmental Site Assessment (Phase I ESA) and Phase II Limited Subsurface Investigation (Phase II LSI) of the property referred to as 400 Prospect Street in Stoughton, MA (the Subject Property). In conducting this assessment, RHE followed standards set forth in American Society for Testing and Materials (ASTM) Policies E1527-13 and E1903-19 and general environmental assessment protocol set forth by relevant MassDEP guidance documents and policies. This assessment has revealed the following findings:

- The Subject Property is comprised of six (6) lots, which cumulatively total approximately 8.6-acres, east/northeast of Prospect Street. A portion of the Subject Property is improved with a two-story building with a walk-out basement (i.e., American Legion Hall), which is currently vacant. Bituminous concrete (i.e., asphalt), concrete, and/or maintained landscaping are present at the perimeter of the American Legion Hall. The area west of the paved parking lot has been recently disturbed, and contains stacked logs and wood. The majority of the remainder of the Subject Property is undeveloped and wooded.

- Based on a review of historic topographic maps, aerial photographs, and local agency records, the American Legion Hall was constructed sometime in the 1950s. Review of an aerial photograph from 1952 did not reveal any significant improvements of the Subject Property.

- An approximate 500-gallon capacity single-walled steel underground storage tank (UST) is present south of the southwest corner of the American Legion Hall. The UST contains approximately one-foot of oil, and the bottom of the UST is at an elevation higher than the seasonal high water table. Soil conditions in the area immediately south of the UST were evaluated during the LSI process. We recommend removing the UST, and documenting tank removal activities, in accordance with Local and State regulations.

- Several containers of oil and/or hazardous material (OHM), and aged heavy equipment with no secondary containment, were observed during RHE's site inspections. The presence of containers of OHM and aged heavy equipment was a potential REC that was further evaluated during the LSI process.

- Disturbed earth and/or fill from an unknown origin was observed along the southwestern portion of the cleared portion of the Subject Property and along a portion of the access driveway. The potential presence of fill of an unknown origin at the Subject Property was a potential REC that was further evaluated during the LSI process.

- The Subject Property is not listed on any ASTM-specified State or Federal Regulatory databases. Several off-site properties within ½ mile are hazardous waste generators and/or MassDEP-registered release sites. Based on the results of curbside reconnaissance, and an evaluation of records maintained by the MassDEP, these registered off-site waste generators and confirmed release locations are not considered a concern to this

investigation.

- RHE personnel directed the excavation of eleven (11) test pits throughout the upland portions of the Subject Property on November 4, 2021. Test pits were advanced to depths below the seasonal high water table where feasible. The results of field observations, field screening, and laboratory analysis conducted on soil samples collected from test pits did not reveal the presence of tested contaminants at concentrations greater than the RCS-1 Reportable Concentrations set forth in the Massachusetts Contingency Plan (MCP). The management of excess soil generated during construction activities should be conducted in accordance with the requirements of the MassDEP's Similar Soils Provision Guidance.

With the exception of the above-referenced UST, no confirmed RECs were identified during the Phase II LSI process. RHE recommends removing the UST in accordance with Local and State regulations. Otherwise, no further assessment and/or cleanup is recommended at this time.

2.0 INTRODUCTION

River Hawk Environmental, LLC (RHE) has been retained by the Town of Stoughton to perform a Phase I Environmental Site Assessment (Phase I ESA) and Phase II Limited Subsurface Investigation (Phase II LSI) of the property referred to as 400 Prospect Street in Stoughton, MA (the Subject Property). In conducting this assessment, RHE followed standards set forth in American Society for Testing and Materials (ASTM) Policies E1527-13 and E1903-19 and general environmental assessment protocol set forth by relevant MassDEP guidance documents and policies.

2.1 Purpose

The primary purpose of this assessment was to identify potential recognized environmental conditions (RECs) in connection with the Subject Property. ASTM defines RECs as the presence or likely presence of any hazardous substances or petroleum products in, on, or at the Subject Property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

2.2 Scope of Services

RHE performed visual reconnaissance of the Subject Property, noted use of adjacent properties, and conducted historical and regulatory records research. The following provides a more detailed description of the scope of services:

- Visual inspection of the Subject Property grounds to identify the potential for oil and/or hazardous material (OHM) release(s);
- Visual inspection of the Subject Property for indications of the presence of polychlorinated biphenyls (PCBs) (e.g. electrical transformers and/or hydraulic elevators);
- Visual inspection and categorization of the use of properties which abut the Subject Property for potential off-site sources of OHM contamination;
- Review of local records related to historical ownership, usage and Site development. This also included interviewing local environmental authorities to identify complaints, violations, citations, or inspections related to the Subject Property;
- Interview with the present and prospective owners of the Subject Property (if applicable);
- Review of published Federal regulatory records related to activities at the Subject Property, and to potential off-site sources of OHM impact. Federal records reviewed included the following:
  - National Priorities List (NPL);
  - Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS);

  - Resource Conservation and Recovery Act (RCRA); and
  - Emergency Response Notification System (ERNS).

- Review of readily available Massachusetts Department of Environmental Protection (MassDEP) records and publications for environmental activities at the Subject Property and potential off-site sources of OHM contamination. State records reviewed included the following:
  - MassDEP Reportable Release Lookup Database;
  - MassDEP Registered Underground Storage Tanks (USTs) Database; and
  - MassDEP Registered State Solid Waste Facilities.

- Review of readily available historic documents related to the Subject Property, to assess for potential sources of OHM contamination;

- Review of readily available historic references such as aerial photographs, Sanborn Fire Insurance Maps (if available), previous environmental studies, and/or ownership records associated with the Subject Property and adjoining properties, to evaluate present and historical development/facilities;

- Review of an Environmental Database Report (EDR);

- Excavation of eleven (11) test pits at the Subject Property;

- Total Organic Volatile (TOV) and Metals field screening of thirty-four (34) soil samples;

- Laboratory analysis of four (4) soil samples; and

- Preparation of this report.

This report has been prepared in accordance with the Limitations presented in Appendix A.

2.3 Significant Assumptions and Data Gaps

The results of the findings of the Phase II LSI portion of this report were based on field observations, field screening, and laboratory analysis conducted on soil samples collected at the test pit locations referenced herein. Subsurface conditions in areas outside of the test pit locations have not been verified.

3.0 GENERAL SITE INFORMATION

The following subsections provide information regarding the location, setting, history, and environmental condition of the Subject Property. The location and pertinent details associated with the Subject Property are graphically depicted in Figures 1 and 2. Photographs of the Subject Property and pertinent characteristics are included in Appendix B.

3.1 Site Location and Description

Address:	400 Prospect Street Stoughton, MA 02072
Assessor's Info:	Parcel I.D. 078 002 0 (400 Prospect Street) Parcel I.D. 078 001 0 Parcel I.D. 077 026 0 Parcel I.D. 077 025 0 Parcel I.D. 066 218 0 Parcel I.D. 066 217 0
Latitude/Longitude:	42.122515N, 71.087147W
***Current Owners:**	400 Prospect Street, LLC 1 Swan Court Dorchester, MA 02124 *Based on review of the Stoughton Assessor's Office records.
Underground Utilities:	Not confirmed.
USTs/ASTs:	One (1) potential UST may be present south of the southwest corner of the American Legion Hall.
Additional OHM:	Miscellaneous containers of OHM, with no secondary containment, observed at the Subject Property during the site inspection.

3.2 Description and Current Use of Subject Property

The Subject Property is comprised of six (6) parcels, which total approximately 8.6-acres, east/northeast of Prospect Street in Stoughton, MA. The Subject Property is improved with a two-story building with a walk-out basement (American Legion Hall). Bituminous concrete (i.e., asphalt), concrete, and/or maintained landscaping are present at the perimeter of the American Legion Hall. The American Legion Hall apparently discharges to an on-site sanitary septic system; however, the location of the septic system components was not confirmed during this investigation. An area that was recently cleared, and contains stacked wood, logs, and aged heavy equipment, is present west of the paved parking lot. The remainder of the Subject Property is undeveloped woodland. Topography on the Subject Property generally slopes from the southeast

down to the northwest, and wetland resource areas are present along the northern, western, and southern portions of the Subject Property. Refer to Figure 2 for a graphical display of the Subject Property.

3.3 Historic Use of The Subject Property

Based on an review of topographic maps, aerial photographs, Sanborn Maps, City Directories, local agency records, and an interview of the current property owner, the following is a summary of the chronology of the known usage and development of the Subject Property:

Topographic Maps:
RHE reviewed USGS Topographic Maps from 1894, 1915, 1919, 1936, 1941, 1943, 1946, 1949, 1954, 1958, 1963, 1971, 1975, 1979, 1985, 1987, and 2012 (Appendix C). Review of historic topographic maps revealed that the Subject Property is located in an area of Stoughton that has been developed since at least 1894. A building is first shown on the Subject Property, in the approximate location of the American Legion Hall, in the topographic map dated 1958. Review of topographic maps did not reveal any specific RECs in connection with the Subject Property.

Aerial Photographs:
RHE reviewed aerial photographs from 1952, 1957, 1961, 1969, 1970, 1975, 1985, 1996, 2008, 2012, and 2016 (Appendix D). A building is first shown on the Subject Property, in the approximate location of the American Legion Hall, in the Aerial Photograph dated 1957. Review of aerial photographs did not reveal any specific RECs in connection with the Subject Property.

Sanborn Maps:
EDR Sanborn, Inc. maintains the most complete collection of fire insurance maps (Sanborn Maps). A review of the Sanborn Fire Insurance Atlas Collection did not reveal any Sanborn Maps depicting the Study Area (i.e., un-mapped property). A copy of the abstract report from EDR Sanborn, Inc., which depicts a lack of coverage, is included in Appendix E.

City Directories:
RHE reviewed city directories from 1992, 1995, 2000, 2005, 2010, and 2014 (Appendix F). Review of city directories revealed listings for American Legion Stoughton Post 89 and/or The American Legion at 400 Prospect Street in 1992, 1995, 2000, and/or 2014. Review of city directories did not reveal any specific RECs in connection with the Subject Property.

Additional Local Agency Records:
During the course of research, officials of the Stoughton Assessor's Office, Fire Department, Health Department, Building Department, Public Works Department, Engineering Department/Office of Environmental Affairs, Planning Department, City Clerk's Office, Historical Society, and Conservation Commission were asked if they knew of any environmental concerns at or in the vicinity of the Subject Property. The following relevant information was recovered during the review of town office filings:

Assessor's Office:

RHE made inquiry to the Stoughton Assessor's Office on August 19, 2021. The Assessor's Office provided RHE with copies of the property record cards for the Subject Property. Copies of the property record cards are included in Appendix I.

Based on review of information provided by the Assessor's Office, the Subject Property is owned by 400 Prospect Street, LLC, of Dorchester, MA.

Fire Prevention Office:

RHE submitted a written inquiry to review records maintained by the Stoughton Fire Prevention Office on August 20, 2021. The Fire Department did not provide RHE with any information that would assist in the identification of RECs.

Health Department Office:

RHE submitted a written inquiry to review records maintained by the Stoughton Health Department Office on August 20, 2021. Review of Health Department records revealed that two (2) abutting off-site properties (35 and 45 Christie Murphy Drive) are serviced by private drinking water wells.

Building Department Office:

RHE submitted a written inquiry to review records maintained by the Stoughton Building Department Office on August 20, 2021. Review of Building Department records revealed that the American Legion Building was constructed circa 1956.

Public Works Department Office:

RHE personnel submitted a written inquiry to review records maintained by the Stoughton Public Works Department on August 20, 2021. The Public Works Department did not provide RHE with information that would assist in the identification of RECs.

Engineering Department/Office of Environmental Affairs:

RHE personnel submitted a written inquiry to review records maintained by the Stoughton Engineering Department on August 20, 2021. The Engineering Department/Office of Environmental Affairs did not provide RHE with information that would assist in the identification of RECs.

Planning Department Office:

RHE personnel submitted a written inquiry to review records maintained by the Stoughton Planning Department on August 20, 2021. The Planning Department did not provide RHE with information that would assist in the identification of RECs.

Clerk's Office:

RHE personnel submitted a written inquiry to review records maintained by the Stoughton Town Clerk's Office on August 20, 2021. The Town Clerk's Office did not provide RHE with information that would assist in the identification of RECs.

Historical Society Office:
RHE personnel submitted a written inquiry to review records maintained by the Stoughton Historical Society Office on August 20, 2021. The Historical Society did not respond to RHE's inquiries.

Conservation Commission Office:
RHE personnel submitted a written inquiry to review records maintained by the Stoughton Conservation Commission Office on August 20, 2021. The Conservation Agent indicated that there had been one or more MA Wetlands Protection Act (WPA) filings and/or violations with respect to clearing, land disturbance, and disturbance of invasive species (i.e., Japanese Knotweed) within the buffer zone of wetland resource areas at the Subject Property; however, the Conservation Commission Office did not provide RHE with information that would assist in the identification of RECs.

MassDEP UST and Reportable Release Database Research:
RHE conducted a review of the MassDEP's UST Facility Database and Waste Site & Reportable Releases Data Portal on August 20, 2021. Based on review of the MassDEP's UST Facility Database and Waste Site & Reportable Releases Data Portal, the Subject Property is not identified as a State-listed UST Facility or a State-listed hazardous waste site.

3.4 Current Use of Abutting Properties

The Subject Property is located in an area of Stoughton used for commercial and residential purposes. The following is a brief description of the current uses of abutting properties:

East: Undeveloped Land and Residential.

South: Residential and Roadway Layout (Prospect Street).

West: Residential and Roadway Layout (Prospect Street).

North: Undeveloped Land and Residential.

3.5 Historic Use of Abutting Properties

Based on a review of historic topographic maps, historic aerial photographs, and records maintained by the MassDEP, the following is a description of the known historic uses of abutting properties:

Topographic Maps:
RHE reviewed USGS Topographic Maps from 1894, 1915, 1919, 1936, 1941, 1943, 1946, 1949, 1954, 1958, 1963, 1971, 1975, 1979, 1985, 1987, and 2012 (Appendix C). Review of historic topographic maps revealed that the area in the vicinity of the Subject Property has been developed since at least 1894.

Aerial Photographs:
RHE reviewed aerial photographs from 1952, 1957, 1961, 1969, 1970, 1975, 1985, 1996, 2008, 2012, and 2016 (Appendix D). Review of aerial photographs revealed that the properties in the surrounding area have been undeveloped or developed for residential purposes since at least 1952.

Sanborn Maps:
RHE reviewed fire insurance maps that displayed uses of properties west of the Subject Property dated 1923, 1949, and 1966 (Appendix E). A review of the Sanborn Maps revealed that the abutting properties to the west of the Subject Property have been developed for residential purposes since at least 1923. Properties to the north, east, and south of the Subject Property are not shown on the Sanborn Maps provided by EDR.

City Directories:
RHE reviewed city directories from 1992, 1995, 2000, 2005, 2010, and 2014 (Appendix F). Review of city directories indicated that properties in the vicinity of the Subject Property were listed as occupied by residents in 1992, 1995, 2000, 2005, 2010, and 2014.

MassDEP Reportable Release and UST Databases:
RHE reviewed the MassDEP's UST Facility Database and Waste Site & Reportable Releases Data Portal on August 20, 2021. None of the abutting properties were identified as State-listed UST Facilities or State-listed Release Sites.

3.6 General Hydrogeological Attributes

Topography: Topography at the Subject Property generally slopes down to the south, west, and northwest.

Local Geology: Soil in the upland portions of the Subject Property consists of fill underlain by sand with lesser amounts of silt and gravel.

Groundwater Characteristics: Groundwater was observed at depths ranging from approximately 4.5 to 6 feet below grade during the LSI process. Groundwater flow direction was not confirmed during this investigation.

4.0 CURRENT OWNER PROVIDED INFORMATION

The ASTM Standard for a Phase I ESA requires an assessment of the information and knowledge that the current owner and/or site manager possesses relative to the Subject Property. Information in the following subsections was obtained from an interview questionnaire completed by Mr. Owen Kiernan, manager of 400 Prospect Street, LLC (i.e. owner of the Subject Property). The completed questionnaire form is included in Appendix G.

4.1 Title Records

RHE was not provided with title records for the Subject Property.

4.2 Environmental Impairment and/or Releases of OHM

Mr. Kiernan did not know of any specific chemicals or releases of OHM at the Subject Property.

4.3 Specialized Knowledge

Mr. Kiernan did not provide RHE with any specialized knowledge that would assist in the identification of potential RECs.

4.4 Commonly Known or Reasonably Ascertainable Knowledge

Mr. Kiernan was unaware of any commonly known or reasonably ascertainable knowledge regarding the Subject Property that would assist in the identification of potential RECs.

4.5 Previous Environmental Reports

Mr. Kiernan did not provide RHE with any reports regarding environmental conditions at the Subject Property.

5.0 RECORDS REVIEW OF THE SITE AND ADJACENT PROPERTIES

Past land uses were reviewed to identify historical practices or conditions at or in the vicinity of the Subject Property which may have impacted the environmental quality of the Subject Property. This was accomplished via an interview with the owner of the Subject Property; review of historic aerial photographs; review of Sanborn Fire Insurance Atlases; review of historic USGS topographic maps, review of city directories; and review of environmental records maintained by Federal, State, and Local agencies.

5.1 Topographic Maps

RHE reviewed USGS Topographic Maps. Additional information regarding RHE's evaluation of topographic maps is included in Sections 3.3 and 3.5.

5.2 Aerial Photographs

RHE reviewed aerial photographs. Additional information regarding RHE's evaluation of aerial photographs is included in Sections 3.3 and 3.5.

5.3 Sanborn Fire Insurance Atlases

RHE reviewed/attempted to review Sanborn Maps. Additional information regarding RHE's evaluation of Sanborn Maps is included in Sections 3.3 and 3.5.

5.4 City Directories

RHE reviewed city directories. Additional information regarding RHE's evaluation of city directories is included in Sections 3.3 and 3.5.

5.5 Registry of Deeds Information

Records at the Norfolk County Registry of Deeds were not reviewed during this assessment.

5.6 Environmental Liens and Activity and Use Limitations

Based on a review of the MassDEP Release Site Lookup Database, the Subject Property is not a registered release site, and future uses of the Subject Property have not been limited via implementation of an AUL.

5.7 Federal and State Record Review

RHE procured and reviewed an environmental radius report (ERR) from Environmental Data Resources, Inc. (EDR). A copy of the ERR is included in Appendix H. A review of databases and files from Federal, State, and Local environmental regulatory agencies was conducted to identify use, generation, storage, treatment or disposal of hazardous materials and chemicals, or release

incidents of such materials which may impact the Subject Property, relative to ASTM-specified search radii.

5.7.1 Federal Regulatory Records

A complete listing of the federal regulatory sources reviewed is provided in the ERR. Federal records reviewed include: National Priority List Sites (NPL), Comprehensive Environmental Response, Compensation, and Liability Information System facilities (CERCLIS), and Resource Conservation Recovery Act Hazardous Waste Generators (RCRA Generators) within ASTM-specified search radii. A review of the referenced Federal records indicate that the Subject Property is not listed on any of the above-referenced federal databases. The following subsections provide additional information regarding nearby facilities.

5.7.1.1 Federal NPL List

The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property, nor properties within one-mile of the Subject Property, were identified on the NPL database.

5.7.1.2 Federal CERCLIS List

CERCLIS contains data regarding potentially hazardous waste sites that have been reported to the US EPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites that are included in the NPL database, as well as sites which are in the screening and assessment phase for possible inclusion on the NPL. Neither the Subject Property, nor properties within ½ mile of the Subject Property, were identified on the CERCLIS List.

5.7.1.3 Federal RCRA Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQGs). The Subject Property was not identified as a RCRA-listed hazardous waste generator. Neither the Subject Property, nor immediately abutting properties, were identified as RCRA-listed hazardous waste generators.

5.7.1.4 Federal Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. The Assessment, Cleanup, and Redevelopment Exchange System (ACRES) is an online database for Brownfields Grantees to electronically submit data directly to the US EPA. Neither the Subject Property, nor properties within ½ mile of the Subject Property, were identified as Federal Brownfields Sites.

5.7.1.5 Federal Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the US EPA, the US Coast guard, the National Response Center, and the US DOT. A review of this database was conducted in order to determine whether any spills or incidents involving releases of OHM have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

5.7.1.6 Federal Facility Index System (FINDS)

FINDS is a database managed by the US EPA, which identifies facilities, sites, or places subject to environmental regulations or of environmental interest. The database provides information regarding environmental activities that may impact air, water, and land in the United States. It is usually a cross-reference to other sources/databases that contain more detail. The Subject Property was not identified on the FINDS database.

5.7.2 State Regulatory Records

A complete listing of the state regulatory sources reviewed is provided in the Environmental Database Report. State records reviewed include: state-registered underground storage tanks (UST), state-listed leaking underground storage tanks (LUST), state-listed leaking above ground storage tanks (LAST), state-permitted solid waste facilities/landfill sites (SWF/LS), and state-listed hazardous waste sites (SHWS) within the ASTM-specified search radii. A review of State records indicates that the Subject Property is not listed on any of the State records reviewed. Several Properties in the vicinity of the Subject Property were listed on one or more of the MassDEP regulatory sources reviewed. The following subsections provide additional information regarding these facilities.

5.7.2.1 State Hazardous Waste Sites and Leaking Underground Storage Tanks

Numerous listed MassDEP Release Site locations, Leaking Aboveground Storage Tank (LAST), and/or Leaking Underground Storage Tank (LUST) facilities were identified within ½ mile of the Subject Property. None of these off-site release sites are considered to be a concern to this investigation for one (or both) of the following reasons:

- Permanent Solution Statements (PSS) have been submitted to the MassDEP for several of the MassDEP release sites within ½-mile of the Subject Property. Submission of a PSS report to the MassDEP indicates that these off-site releases are considered to be adequately delineated and pose No Significant Harm, or No Significant Risk to Human Health and the Environment; and/or

- Several of the MassDEP sites within ½-mile of the Subject Property are located either hydraulically crossgradient or downgradient of the Subject Property. Therefore, impact from these off-site releases is not likely to flow towards the Subject Property.

5.7.2.2 State Underground Storage Tank Facilities

Neither the Subject Property, nor abutting properties, are listed on the MassDEP's UST System facility database.

5.7.2.3 State Landfills

No MassDEP-permitted landfill facilities were identified within one-mile of the Subject Property.

5.7.2.4 Institutional Controls

Based on a review of the MassDEP's Reportable Releases Data Portal , the future use of the Subject Property has not been limited via the implementation of an Activity and Use Limitation.

5.8 Tribal Records

Based on a review of the Environmental Database Report, no records of Tribal facilities that were hazardous waste sites, landfills, LUST, LAST, registered storage tank sites, institutional control sites, voluntary cleanup sites, or Brownfield sites are located within the ASTM-specified search radii of the Subject Property.

5.9 Local Records

RHE inquired with the Stoughton Assessor's Office, Fire Department, Health Department, Building Department, Public Works Department, Engineering Department, Planning Department, City Clerk's Office, Historical Society, and Conservation Commission to find records pertaining to OHM storage, releases, and/or violations associated with the Subject Property. Refer to Section 3.3 for additional information obtained from local agencies. Information obtained from local agencies is included in Appendix I.

6.0 SUBJECT PROPERTY RECONNAISSANCE

RHE representative, Jarod Cournoyer, conducted reconnaissance of the Subject Property (i.e., site inspection) on September 13, 2021. The site inspection consisted of an inspection of the Subject Property grounds, accessible areas of the American Legion Hall, and visual reconnaissance of neighboring properties from curbside. Prior to the site inspection, readily available resources such as site plans, historic aerial photographs, USGS topographic maps, flood insurance rate maps, and regulatory records were reviewed. A description of the Subject Property is included in Section 3.2. Photographs taken during the site inspection are included in Appendix B.

6.1 Improvements and Site Use

The Subject Property is improved with a multi-story building with a walk-out basement. Bituminous concrete (i.e., asphalt), concrete, and/or maintained landscaping are present at the perimeter of the American Legion Hall.

6.2 Storage Tanks

No aboveground storage tanks (ASTs) were observed on the Subject Property during the inspection. An approximate 500-gallon capacity single-walled steel UST is present south of the southwestern corner of the Site Building. The UST contains approximately one-foot of oil, and the bottom of the UST is at an elevation higher than the seasonal high water table. The presence of a UST at the Subject Property is an REC. We recommend removing the UST in accordance with Local and State regulations.

6.3 Elevators/Hydraulic Lifts

No elevators and/or hydraulic lifts were identified during the site inspection.

6.4 Drums and Containers

No drums were observed on the Subject Property during the inspection. Miscellaneous containers used for the storage of OHM, with no secondary containment, were observed in the parking lot of the Subject Property. The presence of containers used for the storage of OHM, without secondary containment, was a potential REC that was further evaluated during the LSI process.

6.5 Floor Drains

No floor drains were observed in the Site Building during the site inspection.

6.6 Catch Basins

No stormwater catch basins were observed on the Subject Property during the site inspection.

6.7 Electrical Transformers

One (1) pole-mounted electrical transformer was observed south of the Site Building. No evidence of spills or releases of from the electrical transformer were observed at the base of the utility pole.

6.8 Fill Material

Disturbed earth and/or fill from an unknown origin was observed along the southwestern portion of the cleared portion of the Subject Property and between the southern access driveway and abandoned driveway. The potential presence of fill of an unknown origin at the Subject Property was a potential REC that was further evaluated during the LSI process.

6.9 Equipment

Several pieces of aged heavy equipment were observed west of the American Legion Hall. Secondary containment was observed under one, but not all, of the pieces of heavy equipment. The presence of aged heavy equipment, with no secondary containment, was a potential REC that was further evaluated during the LSI process.

6.10 Building Materials

RHE did not inspect the building at the Subject Property for hazardous building materials [i.e., asbestos-containing materials (ACMs), lead-based paint (LBP), or other hazardous building materials]. RHE recommends conducting ACM, LBP, and hazardous building material surveys prior to any renovation or demolition projects.

6.11 Neighboring Properties

Curbside field reconnaissance of the neighboring properties did not reveal indicators of current illegal dumping of OHM or overt indications of surface impacts on adjacent properties.

7.0 INTERVIEWS

This section presents the results of interviews with those knowledgeable about the Subject Property.

7.1 Interview With the Current Owner

Owen Kiernan, manager of 400 Prospect Street, LLC (i.e., the current owner), completed an environmental site assessment questionnaire on September 2, 2021. A copy of the completed questionnaire form is included in Appendix G.

7.2 Interview With the Prospective Purchaser

Representatives of the Town of Stoughton (i.e., the prospective purchaser) completed an environmental site assessment questionnaire on September 2, 2021. A copy of the completed questionnaire form is included in Appendix G.

7.3 Interviews With Local Government Officials

In the course of research, officials of the Stoughton Assessor's Office, Fire Department, Health Department, Building Department, Public Works Department, Engineering Department/Office of Environmental Affairs, Planning Department, City Clerk's Office, Historical Society, and/or Conservation Commission were asked if they knew of any environmental concerns at or in the vicinity of the Subject Property. No town officials provided RHE personnel with evidence of any specific storage and/or releases of OHM at the Subject Property.

7.4 Interviews With Others

No additional interviews were conducted as part of this Phase I ESA.

8.0 LIMITED SUBSURFACE INVESTIGATION

RHE directed the performance of Phase II LSI activities at the Subject Property on November 4, 2021. The Phase II LSI included field observations, field screening, and/or laboratory analysis of soil samples during the excavation of eleven (11) test pits in upland portions of the Subject Property. A summary of the rationale for assessment locations, sample collection methodology, and an evaluation of the results of assessment data in comparison to the RCS-1 Reportable Concentrations set forth in the Massachusetts Contingency Plan (MCP) are included herein.

8.1 Scope of Work

Phase II investigation activities conducted by RHE consisted of the following:

- Excavation of eleven (11) test pits;
- Field screening of thirty-five (35) soil samples;
- Laboratory analysis of four (4) soil samples; and
- Evaluation of soil sample screening and analytical data relative to the Reportable Concentrations set forth in the MCP.

8.2 Rationale for Sampling Locations

RHE identified the following potential Recognized Environmental Conditions (RECs) in connection with the Subject Property during the Phase I ESA process:

Potential Fill of Unknown Origin:
The potential presence of fill of unknown origin at the Subject Property was identified as a Potential REC during the Phase I ESA process. This Potential REC was evaluated via visual observations, field screening, and laboratory analysis of soil samples conducted in conjunction with test pit activities.

Aged Heavy Equipment and Drums with No Secondary Containment:
The presence of aged heavy equipment and drums/small containers with no secondary containment was identified as a Potential REC during the Phase I ESA process. This REC was evaluated via visual observations, field screening, and laboratory analysis of soil samples conducted in conjunction with the excavation of test pits west of the American Legion Hall.

Underground Storage Tank:
A UST was identified in the area south of the southwest corner of the American Legion Hall. This Potential REC was evaluated via confirming the presence of the UST and visual observations and field screening of soil samples from a test pit located immediately south, and hydraulically downgradient of, the UST. The purpose of the test pit in the area hydraulically downgradient of the UST was to identify whether a significant release of petroleum hydrocarbons from the UST system had occurred.

8.3 Soil Assessment Activities

The following is a summary of soil assessment conducted during this investigation:

Test Pit Explorations (November 4, 2021):
RHE personnel directed Hedges Excavating, of Middleboro, MA, during the excavation of eleven (11) test pits (TP-1 through TP-11) throughout the upland portions of the Subject Property on November 4, 2021. Test pits were excavated to depths ranging between approximately 4.5 and 7-feet below grade. The locations of test pits are displayed on Figure 2.

RHE personnel collected soil samples from each soil horizon identified in test pits. Soil samples were screened for Total Organic Volatiles (TOVs) using a RAELite Organic Volatile Meter (OVM) equipped with a 10.6 eV lamp and calibrated with 100 ppmv isobutylene span gas and for Heavy Metals using an Olympus Vanta C Series X-Ray Fluorescence Spectrometer (XRF). Four (4) samples of fill material [TP-1 (0-80"), TP-3 (0-38"), TP-6 (0-57"), and TP-11 (0-29")] were submitted to ESS Laboratory, of Cranston, RI, for analysis of common soil pre-characterization parameters [Total Petroleum Hydrocarbons (TPH), Volatile Organic Compounds (VOCs), Semi-Volatile Organic Compounds (SVOCs), MCP 14 Metals, Polychlorinated Biphenyls (PCBs), and Asbestos). The results of field screening and laboratory analysis conducted on soil samples are summarized in Tables 1 and 2, respectively. The complete laboratory analytical report is included in Appendix J.

Evaluation of Soil Assessment Data:
The following is an evaluation of laboratory analysis conducted on soil samples collected during this investigation:

Soil Classification:
A layer of fill, which contained trace amounts of anthropogenic-related material (asphalt, brick, and concrete) was observed at a thickness ranging from 7" to 80". Soil below the fill layer consisted of sand with lesser amounts of silt and gravel. Organic-rich soil (i.e., muck) was identified in a test pit along the southern portion of the upland area of the Subject Property (test pit TP-7)

Field Screening Results:
Field screening of soil samples collected from soil borings did not reveal the presence of TOV levels greater than 1 ppmv. Isolated detections of select metals (Arsenic and Chromium) were detected in select soil samples. It should be noted that field screening of soil samples is not the basis of determining whether a reportable release condition exists, but is rather a tool for selecting soil samples for proposed laboratory analysis.

Laboratory Analysis Results:
Several metals and Polycyclic Aromatic Hydrocarbons (PAHs) were detected in samples of fill material; however, none of the analyzed constituents were detected at concentrations greater than the MCP RCS-1 Reportable Concentrations in the four (4) pre-characterization samples collected during this investigation.

Regulatory Evaluation:

The results of laboratory analysis conducted on samples of fill material collected during this investigation do not require notification to the MassDEP, and it is the opinion of RHE that soil conditions at depths ranging between 0 and 4 feet below grade at the Subject Property are not a REC. The management of excess soil generated during construction should be conducted in accordance with the requirements set forth in the MassDEP's Similar Soils Provision Guidance

9.0 FINDINGS & CONCLUSIONS

River Hawk Environmental, LLC (RHE) has been retained by the Town of Stoughton to perform a Phase I Environmental Site Assessment (Phase I ESA) and Phase II Limited Subsurface Investigation (Phase II LSI) of the property referred to as 400 Prospect Street in Stoughton, MA (the Subject Property). In conducting this assessment, RHE followed standards set forth in American Society for Testing and Materials (ASTM) Policies E1527-13 and E1903-19 and general environmental assessment protocol set forth by relevant MassDEP guidance documents and policies. This assessment has revealed the following findings:

- The Subject Property is comprised of six (6) lots, which cumulatively total approximately 8.6-acres, east/northeast of Prospect Street. A portion of the Subject Property is improved with a two-story building with a walk-out basement (i.e., American Legion Hall), which is currently vacant. Bituminous concrete (i.e., asphalt), concrete, and/or maintained landscaping are present at the perimeter of the American Legion Hall. The area west of the paved parking lot has been recently disturbed, and contains stacked logs and wood. The majority of the remainder of the Subject Property is undeveloped and wooded.

- Based on a review of historic topographic maps, aerial photographs, and local agency records, the American Legion Hall was constructed sometime in the 1950s. Review of an aerial photograph from 1952 did not reveal any significant improvements of the Subject Property.

- An approximate 500-gallon capacity single-walled steel underground storage tank (UST) is present south of the southwest corner of the American Legion Hall. The UST contains approximately one-foot of oil, and the bottom of the UST is at an elevation higher than the seasonal high water table. Soil conditions in the area immediately south of the UST were evaluated during the LSI process. We recommend removing the UST, and documenting tank removal activities, in accordance with Local and State regulations.

- Several containers of oil and/or hazardous material (OHM), and aged heavy equipment with no secondary containment, were observed during RHE's site inspections. The presence of containers of OHM and aged heavy equipment was a potential REC that was further evaluated during the LSI process.

- Disturbed earth and/or fill from an unknown origin was observed along the southwestern portion of the cleared portion of the Subject Property and along a portion of the access driveway. The potential presence of fill of an unknown origin at the Subject Property was a potential REC that was further evaluated during the LSI process.

- The Subject Property is not listed on any ASTM-specified State or Federal Regulatory databases. Several off-site properties within ½ mile are hazardous waste generators and/or MassDEP-registered release sites. Based on the results of curbside reconnaissance, and an evaluation of records maintained by the MassDEP, these registered off-site waste generators and confirmed release locations are not considered a concern to this investigation.

- RHE personnel directed the excavation of eleven (11) test pits throughout the upland portions of the Subject Property on November 4, 2021. Test pits were advanced to depths below the seasonal high water table where feasible. The results of field observations, field screening, and laboratory analysis conducted on soil samples collected from test pits did not reveal the presence of tested contaminants at concentrations greater than the RCS-1 Reportable Concentrations set forth in the Massachusetts Contingency Plan (MCP). The management of excess soil generated during construction activities should be conducted in accordance with the requirements of the MassDEP's Similar Soils Provision Guidance.

With the exception of the above-referenced UST, no confirmed RECs were identified during the Phase II LSI process. RHE recommends removing the UST in accordance with Local and State regulations. Otherwise, no further assessment and/or cleanup is recommended at this time.

ND: Not detected at a concentration greater than the analytical method detection limit (i.e., non-detect).
NS: No Standard in the MCP.
Note 1: Values shaded in yellow are greater than the RCS-1 Reportable Concentration.

APPENDIX A

Limitations and Qualifications

LIMITATIONS

This site assessment was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area, and the same degree of care and skill was conducted as is generally exercised by other consultants under similar circumstances and conditions. The scope of work for this project was developed to provide assurances for the Town of Stoughton. The findings and conclusions must be considered not as scientific certainties, but rather as professional opinion concerning the significance of the limited data gathered during the course of the environmental site assessment in accordance with the specific scope of services. No other warranty, expressed or implied, is made. Specifically, RHE does not and cannot represent that the Subject Property contains no hazardous material, oil or other latent condition beyond that observed during this site assessment.

This assessment and report have been prepared on behalf of and for the benefit of the Town of Stoughton solely for use in an environmental assessment of the Subject Property. If any third parties wish to rely on any of such material then such third parties must obtain the written consent of RHE in order to do so, such consent not to be unreasonably withheld. The report and other materials resulting from RHE's efforts on this project are not intended or represented to be suitable for reuse by the Town of Stoughton beyond a period of 180 days, or on extensions or modifications of this project beyond environmental due diligence and associated follow-up.

It should be noted that all environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. Except as specifically noted in this report, subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the surficial observations. Additionally, the passage of time may result in a change in the environmental characteristics at this Subject Property and surrounding properties. This report does not warrant against future operations or conditions, nor does this warrant operations or conditions present of a type or at a location not investigated. This report is not a regulatory compliance audit.

It must be noted that no investigation can absolutely rule out the existence of any hazardous materials at a given site. This assessment has been based upon research of prior Site history and observable conditions. Existing hazardous materials and contaminants can escape detection using these methods. At this time, the results of this Phase I ESA suggest that *it is likely that potential recognized environmental conditions exist* at the Subject Property.

QUALIFICATIONS

River Hawk Environmental, LLC is a full service engineering design and environmental consulting firm specializing in providing environmental assessment services to a wide range of municipal, commercial, institutional, and private clients throughout the northeastern United States. The company owners, Mr. Robert Rego and Mr. William Kenney, are both Licensed Site Professionals (LSPs) with significant experience with environmental assessment and remediation oversight. Mr. Rego is also a Registered Professional Engineer. RHE's professional team includes design and environmental engineers, geologists, environmental scientists, wetlands specialists, land surveyors, and project administrators who have expertise in solving the full range of engineering design and environmental problems that are being encountered by lending institutions, municipalities, industrial and commercial entities.

Staff members of RHE provide value to clients with their vast knowledge of environmental assessment standards and environmental regulations, extensive experience conducting assessments and field investigation programs, strong working relationships with regulatory agencies, and an eager approach to complete projects in an efficient cost effective manner. RHE has completed hundreds of environmental assessments regarding the presence of recognized environmental conditions on a property in accordance with ASTM environmental assessment standards. The following sections provide a brief overview of the experience of the key RHE team members who performed this assessment:

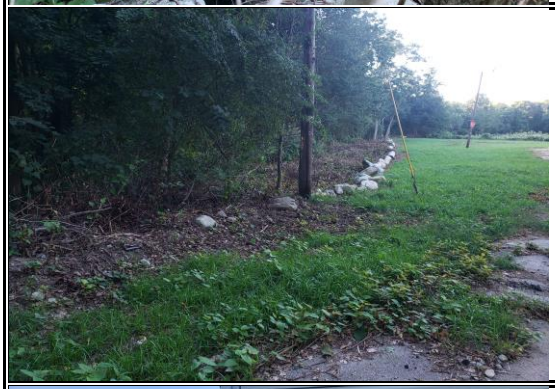

Technical Review and Research & Principal In Charge - **Robert S. Rego, P.E., LSP** is an environmental engineer with over 25 years of diversified experience in the environmental field. He has conducted a vast number of environmental assessments for lending institutions, municipal, commercial, and private clients and is fully versed in the requirements of the ASTM Environmental Assessment Standards. Mr. Rego is also fully knowledgeable of other environmental regulations and has extensive experience in environmental permitting, the collection and assessment of environmental data, and in preparing detailed technical reports. Mr. Rego is the project Quality Assurance and Quality Control director, thereby assuring that all of the work conducted meets appropriate industry standards and RHE's rigorous requirements. Mr. Rego maintains overall responsibility for assessment and regulation-related decisions.

Lead Environmental Investigator - **William P. Kenney, LSP** is a senior geologist and LSP with more than 10-years of practical experience with environmental assessments and subsurface investigations. He has conducted a vast number of environmental assessments for lending institutions, municipal, commercial, and private clients and is fully versed in the requirements of the ASTM Environmental Assessment Standards. Mr. Kenney is also knowledgeable of other environmental regulations and permitting, and routinely organizes and implements projects which require the collection and assessment of environmental data and preparation of detailed technical reports.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by River Hawk Environmental, LLC were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by River Hawk Environmental, LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Interviewee Information:

Interview Date:	
Name:	Fran Bruttaniti
Title:	Procurement Officer
Company:	Town of Stoughton

☒ Potential Owner - Town of Stoughton
☐ Potential Lessee
☐ Potential Occupant
☐ Government Official
☐ Other -

1.) What is the reason why the Phase I is required?

Future Fire Station

2.) What is the Current Use of the Property?

Building on property is not in use

3.) What type of property transaction is this Phase I ESA being conducted for?

☒ Sale
☐ Purchase
☐ Re-Finance
☐ Other (describe) Lease

4.) Have you engaged in a title company or professional to review recorded land title records and lien records?

☐ Yes
☒ No

If yes, describe:

5.) What were the results of the title review?

6.) Are there any services beyond the requirements of Practice 1527 required?

☐ Yes
☐ No

If yes, describe:

unknown at this time

7.) Who is the site contact for the property?

Owen Kiernan is the owner of the property and would be the site contact

---

8.) How can the site contact be reached?

Owen Kiernan cell 617-293-7163 email ownkiernan@gmail.com

9.) Who is the owner of the property?

Owen Kiernan is the owner of the property

10.) Who are the occupants of the property?

Presently unoccupied.

11.) Do any of the parties to the property transaction have a required scope of services?

☐ Yes
☐ No

Unknown - Confirm

If yes, describe:

The Town is working with an OPM for a Feasibility Study and Architect

12.) Other than yourself, will other parties will rely on the Phase I report?

☐ Yes
☐ No

Unknown - Confirm

If yes, describe:

13.) Do you have any other knowledge or experience with the property that may be pertinent to the environmental professional?

☒ Yes
☐ No

If yes, describe:

Property was previously occupied by the American Legion.

14.) Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, and/or local law?

☐ Yes
☒ No

If yes, describe:

15.) Are you aware of any administrative or engineering controls (such as AULs), land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded in a registry of deeds?

☐ Yes
☒ No

If yes, describe:

16.) As the user of this Phase I Report, do you have any specialized knowledge or experience related to the property or nearby properties?

☐ Yes
☒ No

If yes, describe:

17.) Does the purchase price being payed for this property reasonably reflect the fair market value of the property? If not, have you considered whether the price difference is due to contamination?

☒ Yes
☐ No

If yes, describe:

18.) Do you know the past use(s) of the property?

☒ Yes
☐ No

If yes, describe:

Property was previously occupied by the American Legion.

19.) Do you know of specific chemicals that are, or at one time were, present at the property?

☐ Yes
☒ No

If yes, describe:

20.) Do you know of any spills or other chemical releases that have taken place at the property?

☐ Yes
☒ No

If yes, describe:

21.) Do you know of any environmental cleanups that have taken place at the property?

☐ Yes
☒ No

If yes, describe:

22.) As the user of the Phase I Report, based on your knowledge and experience related to the property are there any indicators that point to the presence or likely presence of contamination at the property?

☐ Yes
☐ No

If yes, describe:

Unknown at this time.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

MA SHWS: Contains information on releases of oil and hazardous materials that have been reported to DEP.

A review of the MA SHWS list, as provided by EDR, and dated 03/18/2021 has revealed that there are 36 MA SHWS sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

MA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the MA UST list, as provided by EDR, and dated 07/09/2021 has revealed that there are 2 MA UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SUNOCO SERVICE STA EPA ID:: MAD000846907	PARK AND PROSPECT ST	SSE 0 - 1/8 (0.085 mi.)	3	12

MA HW GEN: Permanent generator identification numbers for all Massachusetts generators of hazardous waste and waste oil that have registered with or notified MassDEP of their hazardous waste activities.

A review of the MA HW GEN list, as provided by EDR, and dated 03/19/2021 has revealed that there is 1 MA HW GEN site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
STOUGHTON GAS AND EL	SCHOOL STREET	WNW 1/2 - 1 (0.839 mi.)	F33	261

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto

site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Action Type: Release Abatement Measure
Action Status: Status or Interim Report Received
Action Date: 5/16/2017
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

CUMBERLAND FARMS (Continued) **S105039546**

Action Type: Release Disposition
Action Status: Reportable Release under MGL 21E
Action Date: 5/20/1994
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Immediate Response Action
Action Status: Written Plan Received
Action Date: 5/21/2001
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: A Notice sent to a Potentially Responsible Party (PRP)
Action Status: A MassDEP piece of correspondence was issued (approvals, NORs, etc.
Action Date: 5/23/1994
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Immediate Response Action
Action Status: IRA Assessment Only
Action Date: 5/24/1994
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Phase 4
Action Status: Notice of Delay in Meeting RA Deadline Received
Action Date: 5/29/2001
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Release Abatement Measure
Action Status: Level I - Technical Screen Audit
Action Date: 5/30/2017
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: RLFA
Action Status: FLDRUN
Action Date: 5/30/2017
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Phase 2
Action Status: Scope of Work Received
Action Date: 5/6/1999
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Response Action Outcome - RAO
Action Status: RAO Statement Received
Action Date: 6/27/2003
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: BOL
Action Status: Transmittal, Notice, or Notification Received
Action Date: 7/13/2017

CUMBERLAND FARMS (Continued) **S105039546**

Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: Immediate Response Action
Action Status: Written Plan Received
Action Date: 7/18/1994
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Action Type: RNF
Action Status: Reportable Release under MGL 21E
Action Date: 7/18/1994

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 02/22/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal Brownfields sites

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 03/24/2021
Date Data Arrived at EDR: 05/11/2021
Date Made Active in Reports: 07/28/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA

Version Date:	2012
North Map:	5644800 BLUE HILLS, MA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

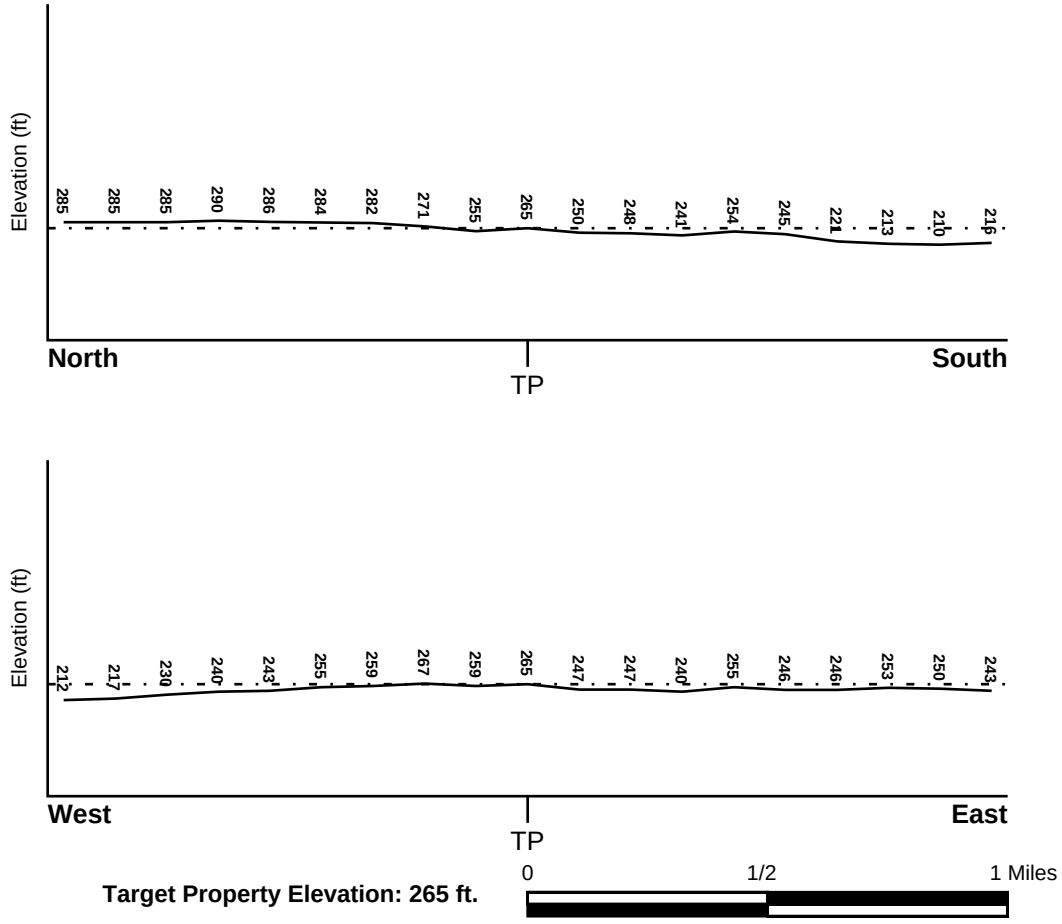

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
25023C0152J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
25021C0213E	FEMA FIRM Flood data
25021C0214E	FEMA FIRM Flood data
25021C0376E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BROCKTON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/4 - 1/2 Mile WSW	VARIES
2	1/4 - 1/2 Mile SSE	WNW
18	1/2 - 1 Mile West	SW
2G	1/2 - 1 Mile West	SW
3G	1/4 - 1/2 Mile WSW	VARIES
4G	1/4 - 1/2 Mile SSE	WNW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Udorthents

Soil Surface Texture: variable

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: 141.14 Min: 0.42	Max: Min:
2	5 inches	59 inches	variable	Not reported	Not reported	Max: 141.14 Min: 0.42	Max: Min:

Soil Map ID: 2

Soil Component Name: Canton

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sandy loam	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 3.6
2	3 inches	18 inches	fine sandy loam	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 3.6
3	18 inches	59 inches	gravelly loamy sand	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 3.6

Soil Map ID: 3

Soil Component Name: Ridgebury

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 8 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	fine sandy loam	Not reported	Not reported	Max: 1.41 Min: 0	Max: 6.5 Min: 4.5
2	9 inches	18 inches	sandy loam	Not reported	Not reported	Max: 1.41 Min: 0	Max: 6.5 Min: 4.5

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	18 inches	59 inches	sandy loam	Not reported	Not reported	Max: 1.41 Min: 0	Max: 6.5 Min: 4.5

Soil Map ID: 4

Soil Component Name: Swansea

Soil Surface Texture: mucky peat

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

Soil Map ID: 5

Soil Component Name: Canton

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sandy loam	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 3.6
2	3 inches	18 inches	fine sandy loam	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 3.6
3	18 inches	59 inches	gravelly loamy sand	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 3.6

Soil Map ID: 6

Soil Component Name: Scituate

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

Soil Map ID: 8

Soil Component Name: Merrimac

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: MassDEP
Telephone: 617-292-5907

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers
Source: Executive Office of Environmental Affairs
Telephone:

Public Water Supply Database

Telephone:
The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

Areas of Critical Environmental Concern

Telephone:
The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers

Telephone:
The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by an EPA hydrogeologist.

Aquifers

Telephone:
MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas

Telephone:
Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

OTHER STATE DATABASE INFORMATION

RADON

State Database: MA Radon
Source: Department of Health
Telephone: 413-586-7525
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

LABORATORY REPORTS

CERTIFICATE OF ANALYSIS

William Kenney
River Hawk Environmental, LLC
2183 Ocean Street, Suite 2
Marshfield, MA 02050

RE: 400 Prospect St Stoughton MA (002450401)
ESS Laboratory Work Order Number: 21K0485

This signed Certificate of Analysis is our approved release of your analytical results. These results are only representative of sample aliquots received at the laboratory. ESS Laboratory expects its clients to follow all regulatory sampling guidelines. Beginning with this page, the entire report has been paginated. This report should not be copied except in full without the approval of the laboratory. Samples will be disposed of thirty days after the final report has been delivered. If you have any questions or concerns, please feel free to call our Customer Service Department.

Laurel Stoddard
Laboratory Director

REVIEWED
By ESS Laboratory at 5:33 pm, Nov 19, 2021

Analytical Summary
The project as described above has been analyzed in accordance with the ESS Quality Assurance Plan. This plan utilizes the following methodologies: US EPA SW-846, US EPA Methods for Chemical Analysis of Water and Wastes per 40 CFR Part 136, APHA Standard Methods for the Examination of Water and Wastewater, American Society for Testing and Materials (ASTM), and other recognized methodologies. The analyses with these noted observations are in conformance to the Quality Assurance Plan. In chromatographic analysis, manual integration is frequently used instead of automated integration because it produces more accurate results.

The test results present in this report are in compliance with TNI and relative state standards, and/or client Quality Assurance Project Plans (QAPP). The laboratory has reviewed the following: Sample Preservations, Hold Times, Initial Calibrations, Continuing Calibrations, Method Blanks, Blank Spikes, Blank Spike Duplicates, Duplicates, Matrix Spikes, Matrix Spike Duplicates, Surrogates and Internal Standards. Any results which were found to be outside of the recommended ranges stated in our SOPs will be noted in the Project Narrative.

Subcontracted Analyses

ProScience Analytical Services, Inc. - Woburn, MA	Asbestos in Soil

CERTIFICATE OF ANALYSIS

Client Name: River Hawk Environmental, LLC
Client Project ID: 400 Prospect St Stoughton MA

ESS Laboratory Work Order: 21K0485

SAMPLE RECEIPT

The following samples were received on November 10, 2021 for the analyses specified on the enclosed Chain of Custody Record.

To achieve CAM compliance for MCP data, ESS Laboratory has reviewed all QA/QC Requirements and Performance Standards listed in each method. Holding times and preservation have also been reviewed. All CAM requirements have been performed and achieved unless noted in the project narrative.

Each method has been set-up in the laboratory to reach required MCP standards. The methods for aqueous VOA and Soil Methanol VOA have known limitations for certain analytes. The regulatory standards may not be achieved due to these limitations. In addition, for all methods, matrix interferences, dilutions, and %Solids may elevate method reporting limits above regulatory standards. ESS Laboratory can provide, upon request, a Limit Checker (regulatory standard comparison spreadsheet) electronic deliverable which will highlight these exceedances.

Low Level VOA vials were frozen by ESS Laboratory onNovember 10, 2021 at 20:26.

Question I: All samples for EPH were analyzed for a subset of the required MCP list per the client's request.

Lab Number	Sample Name	Matrix	Analysis
21K0485-01	TP-1 0-80in	Soil	6010C, 7471B, 8082A, 8100M, 8260B Low, 8270D, SUB

Affirmative responses to questions A through F are required for "Presumptive Certainty" status

A	Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times?	Yes (X) No ( )
B	Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed?	Yes (X) No ( )
C	Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances?	Yes (X) No ( )
D	Does the laboratory report comply with all the reporting requirements specified in the CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data"?	Yes (X) No ( )
E	VPH, EPH, APH and TO-15 only: a. Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications).	Yes (X) No ( )
	b. APH and TO-15 Methods only: Was the complete analyte list reported for each method?	Yes ( ) No ( )
F	Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)?	Yes (X) No ( )

Responses to Questions G, H and I below are required for '"Presumptive Certainty" status

G	Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocols(s)?	Yes (X) No ( )*
	***Data User Note:* Data that achieve "Presumptive Certainty" status may not necessarily meet the data usability and representativeness requirements described in 310 CMR 40. 1056 (2)(k) and WSC-07-350.**	
H	Were **all** QC performance standards specified in the CAM protocol(s) achieved?	Yes ( ) No (X)*
I	Were results reported for the complete analyte list specified in the selected CAM protocol(s)?	Yes ( ) No (X)*

****All negative responses must be addressed in an attached laboratory narrative.***

I, the undersigned, attest under the pains and penalties of perjury that, based upon my personal inquiry of those responsible for obtaining the information, the material contained in this analytical report is, to the best of my knowledge and belief, accurate and complete.

CERTIFICATE OF ANALYSIS

Client Name: River Hawk Environmental, LLC
Client Project ID: 400 Prospect St Stoughton MA

ESS Laboratory Work Order: 21K0485

Notes and Definitions

Z-08	See Attached
U	Analyte included in the analysis, but not detected
Q	Calibration required quadratic regression (Q).
D	Diluted.
CD+	Continuing Calibration %Diff/Drift is above control limit (CD+).
B-	Blank Spike recovery is below lower control limit (B-).
ND	Analyte NOT DETECTED at or above the MRL (LOQ), LOD for DoD Reports, MDL for J-Flagged Analytes
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
MDL	Method Detection Limit
MRL	Method Reporting Limit
LOD	Limit of Detection
LOQ	Limit of Quantitation
DL	Detection Limit
I/V	Initial Volume
F/V	Final Volume
§	Subcontracted analysis; see attached report
1	Range result excludes concentrations of surrogates and/or internal standards eluting in that range.
2	Range result excludes concentrations of target analytes eluting in that range.
3	Range result excludes the concentration of the C9-C10 aromatic range.
Avg	Results reported as a mathematical average.
NR	No Recovery
[CALC]	Calculated Analyte
SUB	Subcontracted analysis; see attached report
RL	Reporting Limit
EDL	Estimated Detection Limit
MF	Membrane Filtration
MPN	Most Probable Number
TNTC	Too numerous to Count
CFU	Colony Forming Units

AEROBIOLOGY LABORATORY ASSOCIATES, INCORPORATED
A Pace Analytical® Laboratory

Shawn Morrell
ESS Laboratory
185 Frances Ave.
Cranston, RI 02910

November 17, 2021

Dear Shawn Morrell,

The enclosed analytical results have been obtained using the EPA/600/R-93/116 method. Calibrated Visual Estimate (CVE) is used by Aerobiology for the determination of the percentage of asbestos and other components in the sample. The sample preparation technique used was in accordance with the US EPA office of Environmental Evaluation and Measurement - Region 1 requirements. This technique involves the elimination of interfering particles through the following steps: homogenization of the sample; separation of different fractions and examination under the stereomicroscope.

The quality control data related to the samples analyzed is available upon client's written request. Aerobiology Laboratory Associates, Inc., assumes no responsibility for potential sample contamination that may have occurred during the sample collection process or erroneous data provided by the client. As such, these results apply to the sample(s) as received.

The enclosed results may not be used under any circumstances as product endorsement by any US government agency including NIST/NVLAP.

All Laboratory records are retained for at least three years unless otherwise directed in writing by the client. The actual samples are retained for a period of two months and written request is necessary in order to be retained for a longer period of time. All analytical results and records are considered strictly confidential and will not be released under any circumstances to anyone except the actual client. The analytical results included in this report apply only to the items tested. This report may not be reproduced, except in its entirety, without the permission of Aerobiology Laboratory Associates, Inc., Laboratory Manager.

If you have any questions please contact the Optical Manager or the Laboratory Manager.

Sincerely,

Aimee L Cormier

Aimee Cormier, Laboratory Manager

Client: River Hawk Environmental, LLC - TB

Shipped/Delivered Via: ESS Courier

ESS Project ID: 21K0485
Date Received: 11/10/2021
Project Due Date: 11/17/2021
Days for Project: 5 Day

1. Air bill manifest present? No
   Air No.: NA
2. Were custody seals present? No
3. Is radiation count <100 CPM? Yes
4. Is a Cooler Present? Yes
   Temp: 4.1 Iced with: Ice
5. Was COC signed and dated by client? Yes
6. Does COC match bottles? Yes / ~~No~~ NA
7. Is COC complete and correct? Yes
8. Were samples received intact? Yes
9. **Were labs informed about short holds & rushes?** Yes / No / NA
10. Were any analyses received outside of hold time? ~~Yes~~ / No
    low level vials

11. Any Subcontracting needed? Yes / No
    ESS Sample IDs: 1-4 Asbestos
    Analysis:
    TAT: 5 day
12. Were VOAs received? Yes / No
    a. Air bubbles in aqueous VOAs? Yes / No
    b. Does methanol cover soil completely? Yes / No / NA
13. Are the samples properly preserved? Yes / No
    a. If metals preserved upon receipt: Date: Time: By:
    b. Low Level VOA vials frozen: Date: 11/10/21 Time: 2036 By:

Sample Receiving Notes:

No vial set received for sample 4.

No indication low level vials frozen. Only one small jar recd for Sample 4.

14. Was there a need to contact Project Manager? Yes / No
    a. Was there a need to contact the client? Yes / No
    Who was contacted? Bill Kenney Date: 11/11/21 Time: 1525 By: ML

Bag recd for sample 3 asbestos contains very little volume.
