

# Be smart about fall cleanup!

Leaves and grass clippings that are dumped or stored near waterways or paved areas add to water pollution and flooding.

## Help keep your local waterways clean and healthy:

- Place raked leaves or lawn clippings in paper bags to be collected by the town.
- Consider composting yard waste.
- Keep paved areas and stormdrains clear of leaves.
- Keep bagged, piled and mulched leaves on natural soil, a few feet back from paved areas.
- Ensure that your lawn service is properly disposing of yard waste.
- Reduce excessive lawn chemical use and always follow manufacturer's directions.
- Call the NSP Stormwater Hotline (781) 575-0354 x300 to report dumping.
