🚨 Skip the Fertilizer! 🚨

Rain washes excess fertilizer into storm drains, polluting our waterways causing harmful algae blooms that put aquatic life at risk.

Ditch the chemicals and protect our water by trying these alternatives:

🌱 Compost for natural nutrients
🌱 Mulch leaves as free fertilizer
🌱 Grasscycle (leave lawn mower clippings in place) for a healthier lawn
🌱 Plant natives—no fertilizer needed!

For more information on fertilizer alternatives visit: https://yourcleanwater.org/lawn/
