Camera system manufacturer \_\_\_\_\_

Remote access    Y    N

What is this program? When a crime occurs in a certain area that would require a criminal investigation and the collection of evidence such as video imagery, a canvassing of the neighborhood or area would be required. This is often highly time consuming considering the time of day and home or business owners who may be elsewhere at the time of the investigation. By knowing the locations of cameras in advance of the need for them, we would have the advantage of resolving crimes with greater expedience in some cases.

The sharing of video footage would be at the consent of the participant of this program when requested by investigators. We would not be asking for access to your systems at any time before an investigation would begin.

This program adds to the safety of our community and is an outreach/partnership effort of the Crime Prevention Unit.

Thank you and be safe.
